

## **Robert Reynolds MD PC**

Dr. Robert Reynolds and Dr. Sanjay Hapani are pleased to provide oncology and hematology services for patients 18 years and older for the diagnosis and treatment of breast cancer, lung cancer, colon cancer, anemia, leukemia, lymphoma as well as other cancer and hematological diagnoses. We are independent (non-hospital) physicians serving patients in central and western Oklahoma. Being an independent practice allows us to provide the highest quality of care in a more cost efficient manner than a hospital-based setting.

Our focus is on you, our patient, and our treatment decisions are based on nationally recognized treatment protocols developed by the National Comprehensive Cancer Network (NCCN) as well as narrower, evidence-based clinical treatment pathways that take into consideration the efficacy, toxicity (side effects) and cost of your treatment. Your doctor will make the appropriate treatment decisions for you and in conjunction with your wishes, not anyone else.

Please contact our NW Oklahoma City office for more information on our physicians and services.

**Robert Reynolds, M.D.**  
**Sanjay Hapani M.D.**  
**Hassan Kaleem, M.D.**
